

LIFEPAK® CR-T AED Training System Information

What's changing with the CR-T?

Changes mimic the changes made to the actual LIFEPAK CR® Plus AEDs. Visit the *CR Plus* AED upgrade page.

Information for U.S. customers

How can I upgrade my existing CR-T?

We are offering a CD with training system upgrade software and configuration tool. Simply load the software from the CD onto a computer (PC), establish a communication link between the computer and the CR-T via a special 9-pin serial port cable and perform the upgrade to the CR-T following the instructions provided. Once the training system is upgraded, the software can be used to change the training system settings to the new Guidelines.

In order to perform this upgrade you will need a computer (PC) with Windows® 98/2000/XP and a 9-pin serial port (a standard connector found on the back of most computers).

Our field service team does not service trainers.

How much will it cost to upgrade my existing CR-T?

The upgrade kit (includes special cable and CD) will cost approximately \$30 in the U.S. The kit can be used to upgrade multiple CR-T training systems. Final pricing will be available at a later date.

When will upgrades be available?

We are currently not accepting orders for CR-T training systems upgrades. Customers with existing CR-T training systems will receive a \$100 credit toward the purchase of a new 500T or CR-T (*proof of purchase required*). Please fill out the order form attached and submit it with your purchase order.

When will NEW Guidelines-ready CR-T training systems be available?

The new Guidelines-ready CR-T training systems are now available for order and are priced at \$299 each. To order a CR-T training system, please call 1-800-442-1142 and reference catalog number 11250-000054.

Information for customers outside the U.S.

The same upgrade methods available inside the U.S. will also be available in many countries outside the U.S. Localized versions of the new LIFEPAK CR-T AED training systems will be available in several languages in July 2006. Availability for additional languages will be announced as they are released. See your local sales consultant for details on pricing and availability.
